# WHAT IS AVPRO ACADEMY?

The world of technology is always advancing and the Audio Video industry is no different. Keeping up with the latest advancements can be tough. AVPro wants to help with that burden by offering industry training where you are able to learn the ins and outs of 4K, HDR, EDID management, display calibration and more. This educational event is a mixture of traditional classroom learning with a huge portion of hands on training. After you complete AVPro Academy and pass an exam you will earn a certificate and become ISF Level I certified.

## BENEFITS:

- Become ISF Level I Certified, display calibration is a must of anyone installing high end displays
- Learn not only how to install but how to sell high end, high bandwidth systems including 18Gbps sources, 4K with HDR displays and 2-piece projection systems
- Understand how to deliver HDR, what the limitations can be, as well as how to overcome these limitations
- Master EDID Management and learn to solve other problems that lead to support issues
- AVPro Academy is accredited by CEDIA and AVIXA, this course will earn you 7 CEUs or 7RUs

## BECOME ISF LEVEL I CERTIFIED:

ISF calibration is a must of anyone installing flat panel displays or projectors. It ensures that the image you are seeing on the screen is as detailed as possible and matches what filmmakers and content creators intended for the viewer to see. Don't let your clients spend the extra money on a nice display and not have it calibrated. Give them the best experience possible by making the video system perform at it's best! AVPro Academy gives you the opportunity to learn how to calibrate a video system, and gives you a chance to become a Level I ISF calibrator. You will learn the science and art behind display calibration and gain the skills to confidently perform this unique service for your clients for years to come.
